E. L. ROSER'S

PRICE LIST OF

SMALL FRUIT PLANTS,

The Strawberry a Specialty.

BRITTAIN, SUMMIT CO., OHIO.

PRICE LIST.

PATRONS: Thanks for your liberal patronage. If you will send me a trial order, or your name on a postal card, I will send you a catalogue of instructions on strawberry culture free.

Varieties Introduced This Year.

Clyde S., A seedling of Cyclone, of Kansas origin. Mich. Ag., Expt. Stn., 1893, says; fruit large to medium in size; productiveness 9.8 quality 8.5 firmness 9.8 Large orders will be filled by the originator, shipping direct to my customers, as my stock of plants is limited. Not fruited, but the vigor of the plant is all that is desired. Price \$2.00 per doz; \$10.00 per hundred.

Bismark S. Originator's description: "Bismark is a seedling of Bubach No. 5, polenized with Van Deman. The plant resembles Bubach in every way, but is more robust and stocky with the same ironclad foliage. The berries are produced in abundance, out-yielding Bubach. Shape obtuse conical, never coxcombed. Color, bright scarlet; no green tips, very firm, good flavor and shipper. Size, large to very large." Orders for Bismark will be filled by the originator shipping direct to the purchaser. Price \$1.00 per 12; \$5.00 per 100; \$30.00 per one thousand.

Snow Ball, S. Of Wisconsin origin. Not fruited, but for growth, vigor, and drouth-resisting power, it ranks first on my place. Prof. Taft of the Mich. Agr. College, July 30, 1895, says: "All varieties were more or less injured by the spring frosts. but the Snow-ball gave a fair crop, considerably above the average. Berries medium to large size." Price \$1.00 per doz.; \$5.00 per 100; \$30.00 per 1000.

Six at 12, 50 at 100 and 500 at 1000 rates.

All plants are freshly dug, packed in moss in the best possible manner, and warranted to reach their destination in excellent condition. Pistillate varieties marked "P" should have every third or fourth row planted to a staminate variety marked "S" to fertilize them. The varieties printed in SMALL CAPITALS and *italics* are best adapted to general cultivation.
